

TUTANKHAMUN

Tutankhamun came to the throne when he was only 9 years old because his father, Akhenaton died

He restored order to the country so Egypt became calm again and people were able to worship the old gods again. Sadly Tutankhamun's reign only lasted 10 years because he died. Tutankhamun was buried in the Valley of the Kings alongside other Pharaohs.

He was buried in three separate coffins inside a beautiful sarcophagus. Amazingly Tutankhamun's tomb was almost untouched by robbers.

Howard Carter finally discovered the tomb of Tutankhamun in 1922 after five years of searching. Most people did not believe he would find it.

His tomb contained fabulous treasures made of gold and all the things he would need in the after life. His body case was found inside a nest of three mummy cases inside a sarcophagus and he was wearing a solid gold death mask. Tutankhamun is probably the most famous pharaoh of all because of his tomb and Howard Carter's discovery.
