

Tutankhamun

Tutankhamun came to the throne when he was only 9 years old because his father Akhenaton died.

The great discovery

In 1922, the English archaeologist Howard Carter made an amazing discovery after years and years of searching.

He died at the age of 18 because he had a really bad head and leg injury.

Tutankhamun was buried in the Valley of the Kings with all of his amazing treasures. Howard Carter found the tomb of the young pharaoh after five years of searching.

Howard Carter found weapons, clothes, furniture, jewellery, musical instruments and model boats in the tomb because the Egyptians believed that he would have another life. Tutankhamun's body was found inside a nest of three mummy cases in a sarcophagus and he was wearing a solid gold death mask.

The resting place of the young king was the only tomb of the New Kingdom to escape from robbers. He is probably the most famous Pharaoh of all because he is remembered for his tomb in the Valley of the Kings, which was packed with amazing treasures.
